EDUCATION

Indian Institute of Information Technology (IIIT), Sri City, Tirupati, AP

B.Tech — Computer Science & Engineering

2024 – 2028

CGPA: 7.47

Sri Chaitanya Junior College

Class XII (Intermediate) — MPC

2021 – 2023

Percentage: 92.4% (924/1000)

Sri Chaitanya School

Class X

Completed 2021

Percentage: 99% (594/600)

PROJECTS

GlobeSync — Travel Itinerary and Coordination Platform (TICP) | Team Project

02/2026 – Present

Domain: NestJS, React.js, HTML, CSS, JavaScript, REST APIs, Swagger, UML

- A full-stack travel management platform with **4 role-based actors** — Traveler, Travel Guide, Admin, and Support — enabling end-to-end trip planning, guide coordination, and platform management.
- Travelers can **select pre-planned trips or create custom itineraries**, and filter travel guides by language and experience; guides manage requests and communicate with travelers through a dedicated portal.
- Designed **ER diagrams and activity diagrams** for all 4 actors along with use case, sequence diagrams and structured SRS documentation following standard UML practices.
- Developed the **Travel Guide Portal** end-to-end — request management dashboard, guide filtering system, and in-platform messaging between guides and travelers.
- Built **RESTful APIs** (GET, POST, PUT/PATCH, DELETE) with in-memory data structures, DTO-based validation, proper HTTP status codes, and **Swagger API documentation** reflecting all endpoints with request/response schemas.
- Implemented **Role-Based Access Control (RBAC)** using NestJS Guards/Middleware with roles passed via request headers, and integrated frontend with backend replacing all mock data with live API calls.

Intelligent Travel Recommendation System | Personal Project

05/2026 – Present

Domain: Machine Learning, Data Science, Python

- Developing an AI-powered travel recommendation system that provides personalized destination suggestions based on user preferences, budget, interests, and travel patterns.
- Implementing Machine Learning recommendation techniques such as content-based filtering and similarity analysis for intelligent travel recommendations.
- Working with data preprocessing, user preference analysis, and recommendation algorithms using Python, Pandas, NumPy, and Scikit-learn.
- Focused on building real-world AI-driven solutions integrating recommendation systems with scalable application design.

CERTIFICATIONS & COURSES

The Complete Full-Stack Web Development Bootcamp — Udemy

2026 – In Progress

Topics: HTML, CSS, JavaScript, React.js, Node.js, Express.js, SQL, MongoDB, REST APIs

TECHNICAL SKILLS

Programming Languages: C, Java, Python, JavaScript

Web Technologies: HTML, CSS, JavaScript, React.js, NestJS

Database: SQL, MySQL

Tools & Platforms: Git, GitHub, VS Code, Swagger

Core CS Concepts: DSA, OOP, DBMS, Computer Networks, Operating Systems, AI

Soft Skills: Communication, Teamwork, Problem Solving, Aptitude

DOMAIN EXPERTISE

- Software Development
- Database Management Systems
- Full Stack Development
- Artificial Intelligence & Machine Learning

AREA OF INTEREST

- Artificial Intelligence & Machine Learning** — Developing intelligent systems and real-world AI/ML applications.
- Full Stack Development** -Building scalable, user-centric web applications using modern frontend and backend technologies.
- Data Structures & Algorithms** — Applying efficient problem-solving techniques to design optimized software solution
- Software Engineering** — Bridging theoretical knowledge with practical, industry-ready software development practices.
